

### Leitbild unserer STS-Mitte in englischer Sprache:

#### 1. Diversity is wealth

We consider the diversity of our pupil and school staff as our school worth. Therefore, we are convinced that we can learn from the other. We consider our school as social platform for social learning where people from different cultures and religions live together, no matter what their orientation, languages and talents are.

#### 2. A strong school community

We, school management, teaching staff, employees, pupils and their parents, are building a strong school community. We are living and learning together in a tolerant, violence-free environment that is characterized with democracy, respect, and mutual appreciation. Thus, we will be able to develop a strong spirit and feeling of the team in addition to all parties' satisfaction.

#### 3. Preparation for work and life

Our school works continuously to prepare pupils from grades 5-13 for a self-independent life and also to get prepared for work. Therefore, we lay a great significant on cooperation with other learning institutions outside the school, like companies, consultancies and high preparatory schools. This depends on personality, strength, ability to work and being part of a team separately.

#### 4. Arts and sports mediate a special learning experience

We consider arts ( Theater, Music and Art) as fundamental school tasks. We also use your rich diverse cultures for personal development, in order to unleash talents like self-confidence, ambition, and social behavior and develop them.

#### 5. School as a living-space

Our school day is a living space for learning, working eating, and playing. Where we have space for movement and relaxation, in addition to a healthy nutrition, sustainable environment, and a comfortable learning atmosphere.

#### 6. Integration with/in „Stadtteil-School“

Our school is considered as a vital part of the city and enjoys good relationships with diverse local institutions and initiatives. In addition to being a learning center, the school offers opportunities to build and add experiences and relationships with the institutions through school classes.
